

CHAIRSIDE® Attachment Processing Material is easy to use and predictable when processing attachments into full and partial overdentures, using either a chairside or laboratory procedure. Two size options to suit your implant practice.

- 8g (4ml) syringe for pickup of LOCATOR® and SATURNO® Denture Attachment Housings.
- Large 18ml cartridge ideal for full arch fixed provisional prostheses utilizing immediate load protocols such as LOCATOR F-Tx®.

COST EFFICIENT

- No primer required for reduced chairtime.
- Shorter mixing tip reduces material waste and cost per case*.

SIMPLE APPLICATION

- Optimal viscosity for accurate application.
- Bonds to itself for efficient void fill and touch-ups.
- Dual cure capability provides convenient self or light cure flexibility.

PATIENT FRIENDLY

- Low curing temperature ensures patient comfort.
- Odorless and tasteless to increase patient acceptance.

External cooling with air or water not recommended. Burs may generate heat; take care not to touch the tip immediately after use.

CHAIRSIDE® Soft Reline Material is a soft, silicone based reline material for patients that require relief for full and partial maxillary and mandibular dentures.

PATIENT COMFORT

- Silicone based material is tasteless, odorless and provides a secure long-lasting smooth finish that prevents contamination and odor. Soft silicone material is comfortable and does not harden over time.

EASY HANDLING

- Auto dispensing cartridge uses up to 40% less material*, allows for quick material preparation and has an efficient working time of up to two (2) minutes with a quick five (5) minute intraoral setting time.

LONG LASTING

- Strong denture adhesion and high tear strength provide a reline with long lasting stain resistance for wear up to 18 months.

*Compared to using longer tips.

CHAIRSIDE® Block Out Material is a light-cured protective material that removes undercuts while processing overdentures chairside.

PATIENT COMFORT

- Acrylic resin remains cool and comfortable during light curing, preventing discomfort and harm to the tissue.

EASY HANDLING

- Viscous material stays put using syringe delivery. Contrasting blue color is easy to see, flexible and simple to remove.

MULTIPLE USES

CHAIRSIDE Block Out is an optimal material for blocking out undercuts for LOCATOR® Cases - it is also ideal to:

- Protect tissue while bleaching, sandblasting or using air abrasion.
- Seal around rubber dams.
- Repair torn rubber dams.
- Maintain reservoir space for bleaching trays.

CHAIRSIDE® VPS Impression and Bite Registration Materials are additional-cure vinyl polysiloxane (VPS) materials developed to capture accurate impressions for all implant cases, in a predictable and consistent manner.

Available in medium set-times and color-coded viscosities with light, medium, and heavy-body formulations, these materials allow practitioners to efficiently address a variety of clinical situations including challenging, long-span cases and edentulous treatments.

Material Properties of CHAIRSIDE® Materials

CHAIRSIDE Impression and Bite Registration Materials	COLOR	WORKING TIME At Room Temperature (73°F/23°C) min:sec	SETTING TIME Intraorally (95°F/35°C) min:sec	DUROMETER READING
Light Body	Magenta	2:15 minutes	4 minutes	43
Medium Body	Dark Blue			48
Heavy Body	Yellow			63
Bite Registration	Light Blue	20 seconds	60 seconds	85

Product Ordering Information

ITEM NUMBER	DESCRIPTION	MATERIAL COLOR	PRICE
09614	CHAIRSIDE Impression Material, Light Body (includes (2) 50ml cartridges, 6 mixing tips, 6 curved tips)		\$40.00
09615	CHAIRSIDE Impression Material, Medium Body (includes (2) 50ml cartridges, 6 mixing tips)		\$40.00
09616	CHAIRSIDE Impression Material, Heavy Body (includes (2) 50ml cartridges, 6 mixing tips)		\$40.00
09572	CHAIRSIDE Bite Registration Material (includes (2) 50ml cartridges, 6 mixing tips)		\$40.00

CHAIRSIDE® Massad® Edentulous Low Temp Impression Trays are moldable stock impression trays that allow superior full-arch impressions with as much detail as a custom tray.

ACCURACY AND TIME SAVINGS

- Using a hot water bath, the thermoplastic trays are easily formed and adapted in the patient’s mouth.
- One visit final impressions that are fully adjustable in <1 minute.

ERGONOMIC AND ANATOMICAL DESIGN

MAXILLA TRAYS

- Low vestibular borders and release areas for various muscle attachments.
- Retention slots and grooves positioned throughout for better adhesion and proper flow of impression material.
- Contoured posteriors to precisely capture hard/soft palate throat form.

MANDIBLE TRAYS

- Precisely capture anatomical and physiological mylohyoid and retromyohyoid space.
- Longer/lower tray handle positions to prevent interference with the opposing lip tissue and ergonomic finger supports to provide stability and balance during impression procedures.

Product Ordering Information

Available in five (5) sizes for maxillary and mandibular arches.

PATIENT FRIENDLY AND EASY TO USE

- Large ergonomic handle for easy, no slip grasping. Bi-directional design for patients with manual dexterity limitations.
- Angled handle facilitates a comfortable approach to the intraoral environment and the extended neck allows the patient to reach prosthetic flanges while keeping the tool at a patient comfortable level (at or below the chin).
- Rounded tip and no sharp edges to prevent soft tissue trauma or prosthesis damage.

DO YOU HAVE PATIENTS OR PRIMARY CAREGIVERS THAT STRUGGLE WITH DENTURE REMOVAL?

Now you can give them a solution with the CHAIRSIDE® Denture Removal Tool. This easy to use tool is designed to be used by the patient, or a caregiver, to assist with the dislodgement of a dental prosthesis including dentures and implant overdentures.

Insert removal edge under flange of denture.

Use handle of tool to pull down to disengage the overdenture.
