

LOCATOR[®]

IMPLANT SYSTEM

Globally Trusted, Now for FIXED.

The Gold Standard for Standard
and Narrow Ridges.

The LOCATOR® Connection

The LOCATOR® implant system, now supporting both removable and FIXED treatment plans, offers you the confidence that comes with one of the most trusted names in dentistry. LOCATOR and LOCATOR FIXED use the same LOCATOR abutment and workflow, which allows you to expand your patient universe and grow your practice. By bundling the abutment, processing components, and implant we're able to deliver an implant system that will change the way you approach edentulous or partially edentulous patients. This all-in pricing can reduce the cost of LOCATOR implant and abutment pairings by 50% or more, increasing the universe of treatable patients.

LOCATOR Removable

LOCATOR FIXED

Best of all, they come in the diameters needed for both standard and narrow ridged patients.

Available Diameter sizes:
2.4, 2.9, 3.5, 3.9, 4.4, 4.9mm

2.4mm

The LOCATOR® Name

"The simplicity of the system and the versatility of the implant size selection allow me to customize every clinical scenario, which helps me achieve consistent predictable success for my patients.

Having used the LOCATOR system for my Overdenture cases for over 20 years, it is with great confidence that I trust in the quality of the LOCATOR implant for my removable cases.

The value of the LOCATOR Implants allows me to provide services to patients that otherwise would have no access to the benefits of the implant retained Overdenture."

-Xavier Saab, DDS, MS

In addition to simplifying ordering and inventory, LOCATOR's all-in approach allows you to provide full-arch solutions to a range of underserved patients. The patient-friendly pricing can allow you the option of doing 'four implant overdenture procedures' at the same cost of doing a 'two-implant procedure' with other higher priced implants or reduce the cost of removable overdenture and Fixed full-arch procedures to reach more potential patients. All while maintaining the biomechanical standards that have earned the trust of dental professionals.

FOR NARROW & STANDARD RIDGE CASES

Increased Opportunities

“When treating edentulous patients with implant retained soft tissue supported overdentures, my abutment of choice has always been LOCATOR. Zest Dental Solutions is a trusted company with a proven track record. When I found out they were expanding their line to include standard ridge implants, I was excited to be able to utilize them in even more cases. Producing the entire system ensures quality implants and abutments that work well together for implant overdenture solutions.”

–David Little, DDS

Surgical Kit

Guided Surgical Kit

Diamond-Like Carbon Coated Drill

Easy-to-Follow Surgical Kits

ZEST LOCATOR® Implant Surgical Kits make implant procedures simpler, easier, and worry free. This empowers you to focus your energy on the clinical and esthetic results you're trying to achieve. The system makes it easy for doctors of all training levels to achieve outstanding results. The easy-to-follow color-coded drill protocol and surgical kit design simplify the mental load and streamline the thought process. With LOCATOR Implants you get everything you would expect from a premium price in our affordable bundled solution.

- Available in standard or Keyless guided configurations
- Space-saving footprint
- Easy-to-follow drill protocol printed on kit
- Space to store LOCATOR Core Tool and Torque Wrench
- Standard Kit includes NEW DLC drills offering greater efficiency and durability

The LOCATOR® Advantages

RBM

Surface treatment for high level of bone to implant contact and osseointegration

One Connection for All

Single 2.9mm prosthetic connection for all implant sizes enabling a platform switch for standard ridge designs

Reduced Diameter

Reduced neck diameter is designed to reduce stress on the crestal bone

Tapered Core

Gradual bone condensing for reliable functionality

Apical Cutting Flutes

For ease of insertion and stability during placement

Tip Design

Custom tip design based on implant diameter for ease of placement

Dual Lead Custom Thread

Progressive thread design for primary bone stability, bone condensing and speed of insertion. Thread design is more aggressive as implant diameter increases.

Driven by Innovation

NEW LOCATOR Implant System is compatible with LOCATOR R-Tx Abutments offering 25%¹ greater wear resistance, an impressive 60° of total implant divergence and dual retentive surfaces for easier seating of the overdenture. LOCATOR R-Tx delivers greater durability with easier maintenance and is now the perfect companion to the AFFORDABLE LOCATOR Overdenture Implant!

From Removable to FIXED... Upgrade to LOCATOR FIXED with the Same Implant and Abutment

Introducing a NEW flexible and accessible FIXED full-arch solution

- LOCATOR Removable or FIXED... it's your choice.
- Utilize patients' existing or newly placed LOCATOR Abutments to transition to a FIXED full-arch solution.
- Offer staged treatment planning for your patients, removable today... FIXED tomorrow.
- Give your patients the life they had with their permanent teeth with an affordable, permanent teeth solution
- A LOCATOR proven alternative to the discomfort and pain associated with conventional dentures that feels more like permanent teeth.

Same Abutment,
Reduced Chairtime,
Less Bone Reduction...
LOCATOR FIXED

The ENCOMPASS 'Inside-the-Box' Advantage

Supported by LOCATOR® Abutments and Implants, ENCOMPASS is the complete 'overdentures-in-a-box' kit that puts everything you need to create custom-fitted overdentures quickly, competently and simply.

- Streamlines workflow, simplifies clinical actions, and expands your scope of treatable patients
- Reduces the number of possible visits by half, from 4-6 visits to as little as 2-3
- Eliminates clinical guesswork showing exactly where the implants get placed
- Partnership between ZEST Dental Solutions & Absolute Dental Services

ENCOMPASS eliminates the financial and physical barriers between edentulous patients and quality treatment, raising the standard of care for the whole of the profession.

Contents Include: LOCATOR implants and abutments, LOCATOR Processing Packs, pilot surgical guide, Premium 3D Printed Absolute Forever Denture, treatment planning, CHAIRSIDE® finishing burs and attachment processing material, patient denture removal tool, plus cloud support.

**ENCOMPASS is only available in the US and may not be available to all customers.*
